Kersten K-Line 1500pro

The K-Line 1500pro two wheel tractors feature premium engines, hydraulic transmission to the wheels and hydraulic power take off to the implement. The hydraulic systems allow the operator to finely adjust the power unit to suit many tasks. The Kersten quick attach system is a standard feature of these machines and enables attachments to be changed in seconds without the use of tools. The hydraulic operation also means maintenance is kept to a minimum.

Kersten offers a range of robust attachments for the clearance and collection of debris from a variety of surfaces including roads, yards, tennis courts, factories, synthetic sports surfaces and even grass. Efficient collection may be made using the easy to empty collector box and the side gully brush looks after the edges. The front brush guard prevents material from being thrown from the brush when the collector is not being used. A sprinkler system can be fitted for use in dusty conditions. Snow can be cleared using the brush or a snow blade and slippery surfaces dealt with using the salt, sand and grit spreader.
